

WANTED

USED VEGETABLE OIL

Sundance Renewables has set up south Wales' first community based Biodiesel Processing Plant which will produce top quality biodiesel for sale in the community.

For this project to be successful we need your support in obtaining and recycling as much used vegetable oil as possible.

From the fryer to the fuel tank -
an environmentally friendly initiative giving
real benefits to your community

It is common practice in the UK to recycle used vegetable oil into animal feed, this will be prohibited in 2004 and is already banned in the EU.

Please support Sundance Renewables by recycling your used vegetable oil in a way that benefits everyone. Quality biodiesel is superior to petro-diesel and the environmental benefits will have a real and lasting effect on all our futures.

Do your bit for the environment & help prevent global warming - call us today

COLLECTION

We offer a weekly, fortnightly or monthly collection in West Wales, providing 10-20 litre drums.
